**nLogic Denmark A/S and Cato Networks Announce SASE Collaboration**

Copenhagen, October 7, 2025 - nLogic Denmark, a leading IT infrastructure partner within networking and security, today announced a new collaboration with Cato Networks to deliver Secure Access Service Edge (SASE) to Danish enterprises.

Cato Networks, a recognised leader in SASE, provides enterprise-grade networking and security through a converged, cloud-native platform. Through this collaboration, nLogic Denmark A/S can offer customers a solution that replaces legacy infrastructure, reduces complexity, and supports cloud migration, hybrid work, and international expansion.

With one of the strongest technical teams in the Nordic region, nLogic Denmark A/S brings extensive expertise in designing, implementing, and operating business-critical networks. This competency ensures that enterprises adopting the Cato SASE Cloud Platform can rely on a trusted partner to tailor and optimise solutions to their specific needs.

"With Cato Networks, we can provide Danish enterprises with a flexible, secure, and scalable platform. This allows them to free up resources for growth and innovation while ensuring a solid foundation for their IT," says Esben Dahl-Nielsen, Managing Director, nLogic Denmark.

For Cato Networks, the agreement marks an important step in expanding its presence in the Nordics market. nLogic's local expertise and strong customer relationships provide the ideal foundation for driving adoption of the Cato SASE Cloud Platform in Denmark.

"We are excited about the collaboration with nLogic A/S, whose extensive experience with advanced IT infrastructure solutions will be a strong asset. Together, we can offer Danish enterprises a comprehensive and future-ready SASE solution," says Mark Draper, AVP of Channel Sales, EMEA at Cato Networks.

**About nLogic A/S**
nLogic A/S is part of the nLogic Group – a Nordic IT infrastructure partner specializing in networking, security, data center, and cloud. With many years of experience, nLogic delivers innovative solutions and services that help enterprises build secure and efficient IT environments.
